PRESENTATION

IEFPS USURBIL GLHBI has as purpose to train persons in a human and technical way, with ethic behaviour, critic spirit, satisfaction in the training process, respect whit the environment and integrates into the society; being able to have access to the labour market, to the university or to create their own company.

The vocation of IEFPS USURBIL GLHBI is to be a technical training School, being a reference for companies, having a prestigious image, having relationship with other Schools; developing projects linking our School with the university and the companies around, in the aim to facilitate access to the new technologies and to set up companies.

For this goal we'll use these strategies:

**USURBILGO
LANBIDE
ESKOLA**

PRESENTATION

- 1.- To develop our School with autonomous management, with good installations and up-to-date technological equipments, open to practice educational innovations and applying the continuous improvement as philosophy.
- 2.- To set up the necessary conditions so that students, teachers and auxiliary staff could feel ease at School, promote the team-working and stimulate them for being more competent and to take part in the daily activity.
- 3.- To offer open and accurate information about the management, joining together the objectives of the different Departments with the School main objectives.
- 4.- To get the student's needs and expectative as well as surrounding companies', by means of constant communications and tailor-made relationships, answering with a flexible and quick service.
- 5.- To structure a relationship system with current or future supplier Schools, as well as with foreign Schools or companies.

ACADEMIC OFFER

WORK EXPERIENCE

Vocational training has as compulsory subject a ten week training period in a company.

In this period the students carry out a schedule established in coordination between School and Company. A teacher at School and a trainer at the Company are in charge of supervising their activity.

By the means of the work experience, students complement the skills acquired at School, discover the companies' world, and make easier their labour insertion.

Usurbilgo Lanbide Eskola has agreements for work experience placements with more than 300 companies.

**USURBILGO

ACADEMIC OFFER

WORK EXPERIENCE

Leonardo da Vinci Programme

There is another way to do the work experience subject. The students could do it in an European Company by the means of the **LEONARDO programme**.

This program is financed by the Economic European Community EEC.

The enrolled students have a complementary English course during the school year.

TRAINING VISITS

VISITS TO COMPANIES AND TRADE FAIRS

The students training is completed by visiting companies working on fields related with the academic subjects.

In the same way the students go to specific trade fairs.

The School organize seminars and lectures about subjects of interest for the students' training.

ACADEMIC OFFER

LABOUR INSERTION

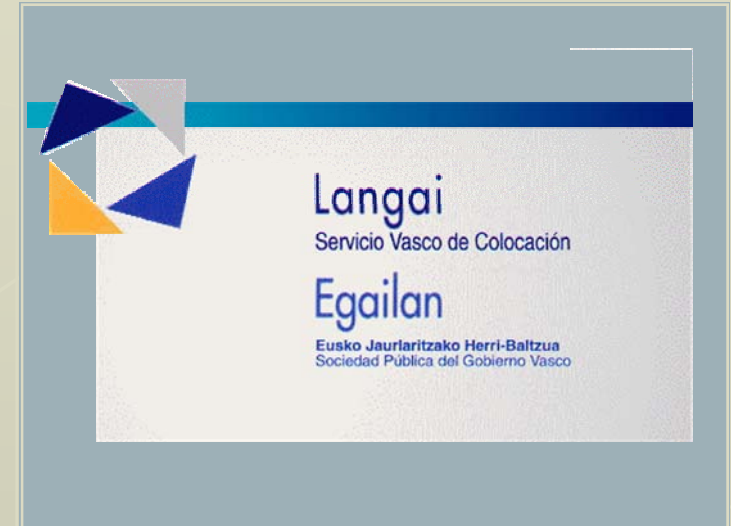

The link between School and students is maintained after the end of the course. It continues until the students have a job.

For this goal there are several paths:

- Basque Service of employment guidance
- Basque Service of employment
- Employment Centre

• On the other hand, exercising the relationships with companies the School is able to manage employment offers.

The consequence is a high rate of insertion in the last 5 years.
Last year the rate was **92,5%**

ACADEMIC OFFER

CONTINUOUS TRAINING

Usurbilgo Lanbide Eskola contributes to the continuous training of workers and unemployed people, bringing up to date their skills in order to face up to the current technological challenges of the industry.

To put this training in practice there are different kind of courses:

- Continuous training for active workers
- Occupational training for unemployed people
- Taylor-made courses

We collaborate with these companies:

Moulinex

FAGOR
Luzuriaga

SCHOOL PROJECTS

RENEWABLE ENERGIES

The Renewable Energy Centre was inaugurated in 2003. The objective is to train, to disseminate and to be a reference and a collaboration Centre for both companies, other Schools, Civil service technicians and general public.

The Renewable Energy Centre is equipped with :

- Geothermal energy
- Solar thermal
- Solar Photovoltaic
- Wind energy

There is also

- Didactic boards.
- Monitorization of the installations.
- A classroom devoted to efficiency and savings of energy.
- The building has a B energetic certificate.

We have collaboration agreements with:

CENSOLAR 1^o national
Centre in solar energy
training.

ARGI TA GARBI Local association
of renewable energy producers.

SCHOOL PROJECTS

HIGH SPEED MECHANIZATION

Usurbilgo Lanbide Eskola knows the importance of the new mechanization techniques, so it has been working in a high speed mechanization project since 2002. In 2003 a second high speed mechanization machine arrived bias an agreement with the Basque Government.

This project has a double objective:

- To serve as a bridge between vocational schools and companies.
- To contribute to the trainers training.

SCHOOL PROJECTS

URRATSBAT-ZUBILAN

The URRATSBAT programme helps students to set up their own companies starting from the vocational schools.

The programme takes advantage of the school's resources, technical as well as human, to set up and to start new companies.

At the moment the School collaborates with EINKOD. His field is to computerizes workshops using code bars.

ZUBILAN is a project that allows students to share school with a real job, developing technical and social skills, and being more multi-purpose.

QUALITY

QUALITY POLICY

Usurbilgo Lanbide Eskola has committed itself to a policy of quality as guarantor of all the School activities.

We take part from the beginning of SAREKA and IKASLAN GIPUZKOA.

As result of this policy our School was one of the first Schools in Spain to obtain the ISO 9002 certificate. In 2003 the School renewed the quality certificate under the new ISO 9001:2000 standard.
